SPECIFICATION

1. Title of Invention: ELECTRIC FAN

2. Claim

"An electric fan comprising a motor, a casing (3a) for covering said motor, a partition (3c) which is in contact with the outer periphery of said motor from inner face of said casing (3a), and a plurality of wind holes formed in the front, rear and side faces of the housing (1) of said motor, said partitions (3c) are formed in the intermediate part between the wind hole of said rear face and the wind hole of said side face and the wind hole of said front face and the wind hole of said side face."

3. Brief Explanation of Drawings

Fig. 1 is a cross section of a conventional electric fan.

Fig. 2 is a cross section of an electric fan of an example of this invention.

4. Explanation of reference numerals

1: motor housing

2a, 2b, 4a, 4b: wind hole

3a, 3b: casing

3c: partition
